

# HIPAA Breach Prevention Pro

DBQ Technology

**Protect PHI. Prove Good Faith. Reduce Risk.**

Covered Entities are a target, regardless of size. If your HIPAA compliance activities are minimal, informal, or poorly documented, your organization may already be exposed.

## The Hidden Compliance Gap

Many Covered Entities have little to no documented HIPAA compliance activity. That can mean missing or outdated policies, limited workforce training, no documented risk analysis, weak phishing defenses, and no clear proof of good-faith effort.

## Backed by the HIPAA Pro Help Desk

Get expert support from the HIPAA Pro Help Desk team, helping Covered Entities strengthen documentation, training, work plans, and compliance readiness with a current 100% OCR audit pass rate.

## Can you afford the cost of delay?

- Investigations and audit exposure
- Costly breaches and legal liability
- Lost trust
- Operational disruption
- Penalties that can threaten the future of the organization

**One phishing email, one workforce mistake, or one unsecured device can trigger serious consequences.**

## The Trusted Solution

HIPAA Breach Prevention Pro gives your organization a complete compliance and security awareness platform—plus access to the HIPAA Pro Help Desk team—so you can start to compile verifiable good faith compliance actions, respond faster to evolving requirements, and reduce risk before it becomes a financial and reputational crisis.
